Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 October 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rand, US 5,960,414.

Rand discloses a computer implemented system for redistributing a part, e.g. Figs. 2-4, regarding excess inventory from actual inventory. Applicant is reminded that intended use claim language, e.g. for redistributing, is given patentable weight, but less patentable weight than positively recited claim language, e.g. a system.

It is noted that Applicant's claim language comprises a positively recited system followed by intended claim language.

Official Notice is taken that defining a plurality of locations and transferring an inventory part from one location to another location has been common knowledge in the inventory art, e.g. see US Patent No. 6,954,734 and the retailer shipping destinations discussed. To have provided such for Rand would have been obvious to one of ordinary skill in the art. The motivation for having done such would have been to implement common knowledge part redistribution when moving inventory. Rand inherently comprises processing units and computer programming to optimize the redistributing of excess part inventory.

Applicant's REMARKS have been reviewed, but are not convincing. Again, defining locations and transferring inventory are both notoriously well known within the inventory replenishment art, e.g. see US 6,954,734. It is further noted that this claim

language is extremely broad in scope and content and does not in itself provide a definable definition over the above combination.

In response to applicant's argument regarding a recitation of the intended use of the claimed invention. Intended use language must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

2. Further pertinent references of interest that address Applicant's invention are noted on the attached PTO-892.

3. Applicant's Information Disclosure Statement (IDS) submitted on January 30, 2002 was reviewed. Note the attached IDS.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37.CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
